WEEK 1	(till 19 june, 2020)
Questions	My Answers
LOOP_CMPL	B (because i thought time & space complexities are the same)
NESTED_CMPL	A(loop inside a loop with n iterations each is n^2)
NESTED_CMPL2	D (same logic as above)
CHOOSE4	B (On taking eg of2 algorithms and put 100000 in both to see)
REC_CMPL1	D(got it right after 2 tries,1st ans was log n 2nd was nlogn)
REC_CMPL2	Wasn't able to solve
REC_CMPL3	Wasnt able to solve
WHILE_CMPL	A(didn't pay enough attention on i/2 ,got the correct ans later)
NESTED_CMPL3	D(the loop runs N(gp) times)
LOOP_CMPL2	B(outer loop runs N times inner runs log n times)
GCD_CMPL	A(got it right in the second try)
AMORTIZED1	A(got it right in the second try)
CHOOSE1	C(got it right in second try, i wasn't able to understand firstly)
CHOOSE3	C
CHOOSE2	(Wasn't able to solve)
